BULLETIN

06/05/2025

Line 1 Production Update: On June 3, 2025, the company increased production on line 1 from 37 units per day to 48 units per day. As of today, line 1 production will be suspended for the rest of the week due to issues in the paint facility. Beginning next week on Monday, June 9th, line 1 will continue to work Monday through Thursday for the next two weeks due to production being suspended the rest of this week. As of now, on Tuesday, June 17th, line 1 production will be 3 days a week, Tuesday-Thursday until shutdown which begins on Friday, July 4, 2025. Line 1 production will be suspended the week of July 21-25, and return on Monday, July 28th. As of now, production schedule will resume at 48 units 3 days per week until the end of August. Currently, the company does not have a definite schedule after August due to on again, off again tariffs and low orders due to the slower than anticipated truck market. The company is not sure when the orders will begin to increase on line 1. **As always – this is all subject to change.**

Line 2 Production: Production will remain at 120 per day. The company was looking at increasing line 2 to 140 but the GM Wentzville plant can't support the increase of cabs for the van line.

Recent Retirees: I would like to congratulate all our 100+ new retirees from the past several months. Thank you for your hard work, dedication and many years of building the best quality trucks day in and day out.
